COMMENTS ON STATEMENT OF REASONS FOR ALLOWANCE

Sir:

This letter is submitted pursuant to M.P.E.P. § 1302.14 in response to the Notice of Allowability dated 28 January 2005 and mailed on 3 February 2005 and, in particular, to the comments of the examiner under the heading "Detailed Action." Under this heading, but before the examiner makes a statement of his reasons for allowance under the subheading "Allowable Subject Matter," the examiner states that "the claims are properly classified in class 385 (optical waveguides), as all claims have the limiting language of "fiber shape."

To the extent that this statement might be construed as a limitation on the allowed claims, Applicants disagree with and oppose such a construction. The claims do contain the limitation of "fiber shape," but the term "fiber" is never limited to an optical waveguide. While optical control of quantum dots to create and manipulate artificial atoms is contemplated in this application, the claimed fiber-shaped material is not described in the specification as an optical waveguide and in most embodiments is likely not an optical waveguide. It is apparent that Applicants lack control over the classification assigned by the U.S. Patent and Trademark Office (USPTO). However, it is Applicants' understanding that both the classification assigned by the

USPTO and the examiner's statement of a reason for allowance have no bearing on the scope or interpretation of the allowed claims.

Respectfully submitted this 28th day of February 2005.
